## ABOUT US

We are a Portuguese group with over 30 years of experience dedicated to trading and developing solutions for the clothing industry.

In recent years we have also invested in a strong consulting and training component with clients and development centers around the world.

### **Advisory**

Whatever the industry, before buying any product, ask our experts and learn about the best solutions to properly equip and produce with maximum efficiency.

### **Technical assistance**

Our technical team is made up of certified and specialized professionals, trained to help all types of clients, from seamstresses to businessmen, offering tailor-made solutions to maximize machine efficiency and potential.

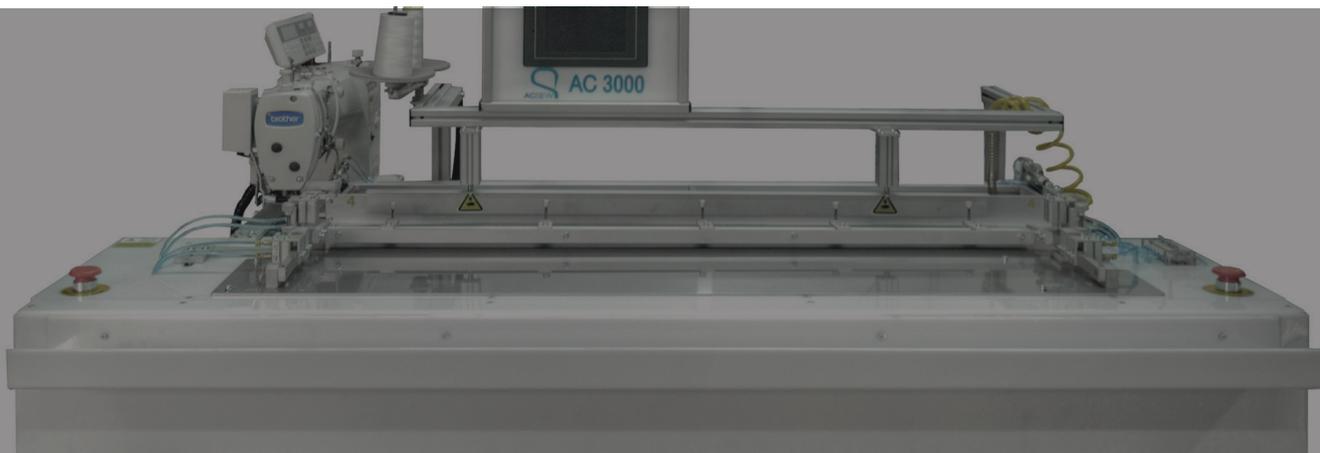

### **Warranty**

We ensure the guarantee of the machines we sell, with a team of specialized technicians, in order to meet customer requirements.

### **Parts & Accessories**

So that sewing machines don't stop, or get them back to production, we have an original Parts & Accessories department and hundreds of other items for the best-known machine brands on the market.

## GARMENT SOLUTIONS

We sell and develop all kinds of sewing solutions. Taking into account the general or specific needs of each client, we have a team of specialists able to develop specific solutions tailored to the client.

## CUTTING ROOM

---

We offer the largest and most modern range of cutting room solutions.

Various models of roll loading and handling systems, automatic spreaders, tables, labelers, automatic cutting machines with different placement thicknesses, from 2.5 to 9 cm and plotters.

## STITCH FREE TECHNOLOGY

We sell stitch free machines for clothing and accessories. An innovative procedure that, compared to traditional adhesive stitching, gives the piece greater comfort, cleanliness and impermeability. Hot glued garments are particularly suited for sporting activities.

## FINISHINGS

---

We market professional ironing machines for the clothing and fashion industry. Each machine is customized according to customer requirements.

# LEAN CONSULTING

---

---

## Learn how to transform your business using the lean philosophy

FILC® through its FILC® Lean service helps companies achieve operational excellence by eliminating waste, streamlining flow, improving performance and hence the quality of products and services.

From developing and implementing Lean strategies to work process analysis and problem solving, we can work with corporate teams to help improve performance and manage growth.

## Services and Support

From companies with production issues to companies facing critical decisions about how to move forward, FILC® Lean can provide the right level of training and support to help you reach the next level.
